

Inflatable advertising space for both indoor and outdoor use

Giant advertising billboards catch the eye, both inside and outside. Use the opportunity to greet visitors with a message on an airframe® before they even go through the door.

airframes® are inflatable frames that do not require either a facade or scaffolding. In order to withstand wind speeds of up to force five (Beaufort) the frames are secured with heavy duty ratchet straps and ballast.

airframes® are comparatively quick and easy to erect and dismantle. Depending on the size of the frame, the correct size of large format banner is required for the front and, if applicable, the back. We are happy to help you with the production of these.

Banner sizes

EASY 725

725cm x 546cm (W x H)

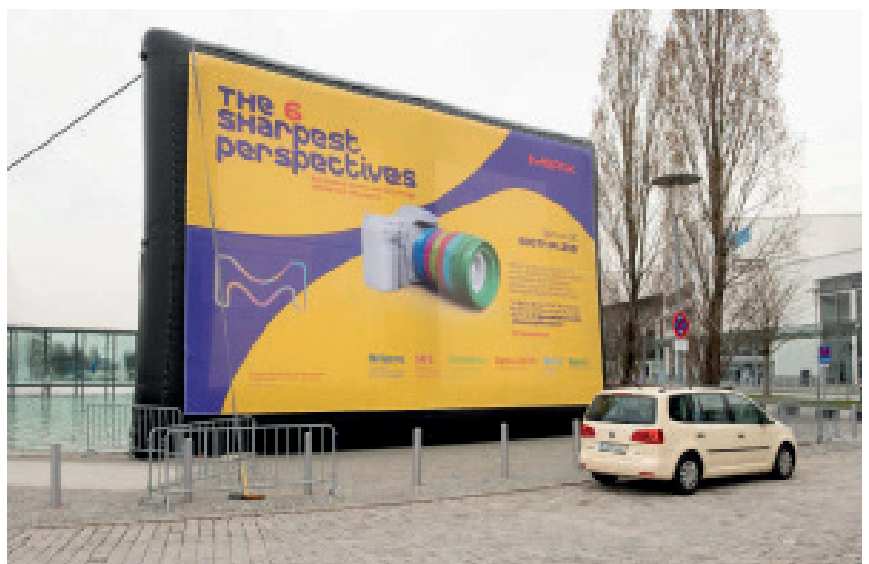

PRO 1200

1200cm x 740cm (W x H)

airframes® in the EASY range, unlike those in the PRO range, do not usually require a permanent air supply and are therefore better suited for use inside buildings.

airframe® EASY 725 | by kind permission of Messe München

airframe® PRO 1200 | by kind permission of Messe München

Technical Specifications

airframe® is an inflatable PVC frame to which a printed advertising banner is attached with bungees.

It can be erected and dismantled very quickly and almost anywhere. Stability is guaranteed through the use of water or concrete weights, or ground anchor pegs. airframe® PRO requires a permanent power supply close by to inflate it.

airframe® EASY can be inflated in a matter of minutes and, depending on the conditions, can stand for a long time without further inflation - ideal for events inside buildings.

At a glance

- Eye-catching
- Quick
- Flexible
- Affordable
- Stable

- Trade fairs / Conventions
- Large events
- Stadiums / Sporting events

airframe® is a trademark of
Moviescreens Rental GmbH.

Inflatable frame

- Black inflatable PVC frame (other colours on request)
- Inflatable within a few minutes using a low-noise blower
- Stable in winds of up to force 5 (Beaufort), 29 - 38 km/h

Advertising banner

- Advertising banner, e.g. Frontlit opaque
- Banner size: EASY 725 - 725cm x 546cm (W x H)
- Banner size: PRO 1200 - 1200cm x 740cm (W x H)
